

A SITE, READ LIKE A DRAWING.

We don't run sites on instinct. Every engagement is set out on one measured framework. Five stations from enquiry to sign - off, each with a hold - point, a deliverable and a signature.

ENQUIRY TO SIGN OFF · THE DELIVERY AXIS

01

BRIEF INTAKE

INITIAL ENQUIRY & SCOPING

Structured scoping - requirements, programme, quality expectations, site constraints. No assumptions, no generic quoting.

02

AGREEMENT

PROPOSAL & ENGAGEMENT

Documented scope, deliverables, quality framework, WHS obligations and terms confirmed. Simply communicated, and auditable from day one.

03

MOBILISATION

PRE - MOBILISATION PLANNING

Site readiness, drawings register, scheduling, contractor & WHS documentations - verified before anyone is on site.

04

EXECUTION

MANAGED DELIVERY

Works run within the agreed framework. Progress reporting, hold - point sign - off and real - time defect management keep the programme protected.

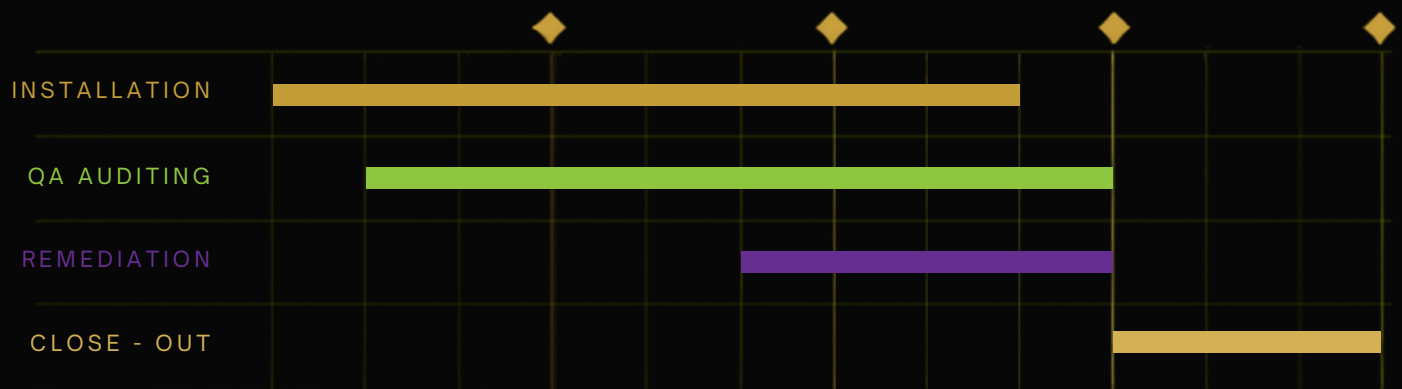

05

CLOSE OUT

HANDOVER & SIGN OFF

A formal close out. Quality evidence pack, sign off and handover. The signature that protects your brand.

PROGRAMMED TO PERFECTION

WHAT HOLDS IT TOGETHER

WHS GOVERNANCE

SWMS, inductions & contractor docs verified before commencement.

HOLD - POINT CONTROL

Work doesn't pass a gate until inspected and signed off.

REAL - TIME DEFECTS

Non - conformances captured to drawings as they arise - not at handover.

DOCUMENTED EVIDENCE

Ensuring an auditable process from start to finish.

THE CLOSE - OUT EVIDENCE PACK

- 01 Quality evidence pack with photos linked to your design intent
- 02 Records of conformance, completion reports, and sign off documents
- 03 Updates on stage completion certificates, and hold point approvals.
- 04 Defect & rectification register, closed & verified

ONE PARTNER. ONE SIGNATURE.

Brief us and we'll outline how we'd manage your package - scope & fee within two working days.
